

NFIRS 5.0 Design Documentation Changes

Change Number	Change Date	Documents Affected	Location In Design Document	Description of Problem	Correction Description
The following changes will be applied in the 2013.1 cycle of the Design Specification effective January 1, 2013.					
351	08/22/12	SPEC-TABLE.XLS, Design Documentation	Design Documentation, Relational Edit 156, Fire Service Casualty Module, Page 109	Relational Edit #156 was not being enforced by the USFA NFIRS validation code and was not needed.	Relational Edit #156 was deleted.
352	08/22/12	SPEC-TABLE.XLS, Design Documentation	Design Documentation, Relational Edit 13 Fire Service Casualty Module, Page 102	Incident Type 320 - "EMS incident, other" should be allowed to have an EMS module	Changed Relational Edit #13 to include Incident Type 320
353	08/22/12	SPEC-TABLE.XLS, Design Documentation	Design Documentation, Incident Module Rule 18, Page 112	Incident Type 320 - "EMS incident, other" should be allowed to have an EMS module	Changed Module Incident Rule #18 to include Incident Type 320
354	08/22/12	SPEC-TABLE.XLS, Design Documentation	Design Documentation, Incident Module Rule 19, Page 112	Incident Type 320 - "EMS incident, other" should be allowed to have a Hazmat module	Changed Module Incident Rule #19 to include Incident Type 320
355	08/22/12	SPEC-TABLE.XLS, Design Documentation	Design Documentation, Relational Edit 19, Basic Module, Page 102	This relational edit was not needed.	Deleted Relational edit 19
356	08/22/12	CRG	CRG, Basic Module, Page 3- 29	The definition/entry description for Mutual/Automatic Aid in the 2012 Complete Reference Guide on page 3-29 was incorrect.	Corrected the definition/entry description for Mutual/Automatic Aid in the Complete Reference Guide.
357	08/22/12	CRG	CRG, Fire Module, Number of Buildings Involved, Page 4-6	The Example was misleading. Flame damage is required for creation of an Exposure report but not damage caused by radiant heat.	Cleaned up the example indicating that the neighboring house caught fire due to radiant heat. Changed to "due to flame damage".
358	08/22/12	Design Documentation	Design Documentation, Data Dictionary, Page 187	In the 2012 Design Documentation in the code list for Mobile Property Make the make names Hesston and Husky both had the same code (HS). This should be Hesston - HE and Husky - HS as documented in the Spec tables spreadsheet.	Changed the Hesston code in the Design Documentation to 'HE'
